OBSERVE GSI-5

Whether it's slush, ice or snow or just simply slippery roads, the Toyo Observe GSi5 has the technology to handle our winter conditions.

TOYO TIRES®
 driven to perform

Go Green
 Printed on recycled paper

For drivers who demand the best out of their winter tires.

OBSERVE GSi-5

A winter tire for passenger, light truck, van, CUV or SUV vehicles.

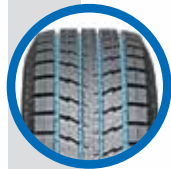

The Toyo Observe GSi5 winter tire is available in a complete size range that covers a variety of vehicles and applications. For passenger vehicles, it is designed for a secure ride while for light truck or van applications, it is designed to handle the load characteristics of that type of vehicle.

Whether it's snow, slush, ice or just simply slippery roads, the Observe GSi5 has the technology to handle all our winter conditions.

MULTI-WAVE SIPES

- >> Multiwave sipes to increase tread block rigidity.
- >> Increased sipe density to increase ice traction.

WIDE LATERAL GROOVES

- >> Wide lateral grooves help evacuate slush for better road grip.

CONTINUOUS CENTRE RIB WITH SWING SIPE

- >> Ensures improved straight line stability while the wave sipe technology increases ice traction in all directions.

LARGE TREAD BLOCKS WITH SAW TOOTHED EDGES

- >> For improved traction in snow and slush when braking or accelerating.

SPIDER SIPE TECHNOLOGY

- >> Advanced multi-directional sipe technology to ensure maximum grip when you are cornering, accelerating or braking.

FIRST EDGE SIPE TECHNOLOGY

- >> Helps ensure initial traction when tire is new.

ARROW LIFT TECHNOLOGY

- >> Helps propel the vehicle through slushy or snowy rutted roads.

OBSERVE MICROBIT TECHNOLOGY

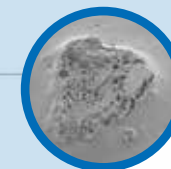

What makes it work so well?

It's a combination of advanced technology and rigorous testing. TOYO Observe winter tires are actually tested and designed for use in even the worst of Canadian winters.

Crushed black walnut shells embedded into the tread compound increases traction and braking on ice and compacted snow. It's like having thousands of tiny spikes digging into the ice or compacted snow. Why walnut shells? Because it is one of the hardest natural substances in the world so it works great plus it's easy on the environment.

Increased levels of silica and improved dispersion in the compound allows better block flexibility at lower temperatures enhancing wet grip and braking, while maintaining traction in low temperatures.

An absorbent carbonic powder made from bamboo charcoal removes the thin water layer on the ice surface allowing for better contact. Better contact means better traction.

Advancements in design technology like "saw toothed" block edges and "multi-wave" sipes increase grip during a variety of winter conditions. At TOYO TIRES we design our winter tires to be "all-around" winter tires ready for all winter conditions.

All-Around Winter Tires!
