PROXES[®] ST II[™]

High Performance SUV's, Sport Trucks & Select Crossovers

The Proxes ST II is Toyo's high-performance radial created for today's SUV's, sport trucks and select crossovers – and the trendsetters who drive them.

The fresh design and advanced tread elements of the Toyo Proxes ST II deliver the perfect balance of style and performance with a luxurious image, superb handling, confident all-season performance, unparalleled noise reduction, and consistent wear.

The Proxes ST II is available in V, W, and Y speed ratings and includes OE and plus fitments from 16-26 inches.

FIVE VARIABLE-PITCH DESIGN
>> Block pitch pattern distributed non-sequentially to enhance noise reduction.

MULTI-WAVE SIPES
>> TOYO TIRES multi-wave sipe technology improves tread block stability by reducing movement. This increases traction and tread life while reducing irregular wear and road noise.

LINEAR GROOVING

>> Horizontal grooves on the tapered edge of the center block lowers pressure on the block edge for better wear and handling.

SILENT WALL TECHNOLOGY

>> Dense perpendicular serrations on the main groove walls disturb airflow through the grooves to reduce noise generation for an exceptionally quiet ride.
