PROXES[®] Sport

Summer Ultra-High Performance

The Toyo Proxes[®] Sport is an ultra-high performance summer tire. Combining enhanced dry and wet road traction ... along with responsive handling and comfort. An ideal tire for drivers who demand the most from their tires.

NANO BALANCE™ TECHNOLOGY

the way the future will roll

An advanced dual compound construction utilizing Nano Balance Technology. This ensures that when rolling resistance is reduced there is no reduction in performance. The result is an actual improvement in cornering and braking performance.

RIGID BASE COMPOUND

>> Rigid elastomers bind the case compound together better controlling the heat generation. This stable base improves rolling resistance while also improving handling capabilities.

HIGH GRIP CAP COMPOUND

>> Higher silica content along with a special elastomer increases wet performance while ensuring less heat buildup during summer months or driving at highway speeds.

BETTER PERFORMANCE - LESS FUEL CONSUMPTION

The results are a tire that saves on fuel with lower rolling resistance. Yet handling, braking and accelerating performance has improved over its predecessor!

Features & Benefits

INSIDE technology — OUTSIDE technology

ASYMMETRIC TREAD DESIGN

- >> Inside technology - Engineered for improved braking and cornering performance.
- >> Outside technology - Engineered for quick responsive steering and driving stability.

3 RIB TREAD DESIGN

- >> 3 straight ribs increases straight line stability reducing the chances of wandering while ensuring a larger amount of the tread remains on the road for responsive handling characteristics.

LARGE OUTER BLOCKS

- >> Larger interlocking outer blocks increases rigidity for improved handling while reducing the risk of block deformation which may cause irregular wear.

4 CIRCUMFERENTIAL GROOVES

- >> 4 wide grooves help evacuate water for added traction during inclement weather.

ADVANCED COMPOUNDS

- >> A combination of advanced compounds within the construction of the casing and along with a unique tread cap compound improves handling and rolling resistance.

HIGHER DENSITY SIPES

- >> Increased siping helps add traction in wet weather driving conditions.

NOTCHED RIB DESIGN

- >> By using uniquely angled notches within the center ribs this further increases the tires' ability to handle wet roads.

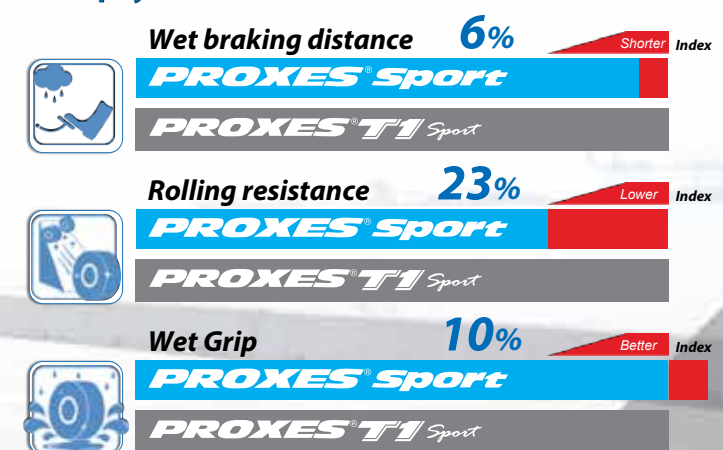

TAPERED RIB EDGE

- >> An angled tapered edge increases the contact patch for a firmer, stiffer grip while cornering and braking.

BARREL RIB TECHNOLOGY

- >> A slightly arched rib design contributes to even contact pressure for added traction.

Simply Better!

Tests are based on increased performance results over the Proxes[®] T1 Sport
