

Technical Data

A tire designed to provide that exhilarating experience ... expected ... from a Toyo Proxes® tire.

"Millennium" warranty:
 - 64,000 km limited treadwear warranty
 - 5 year workmanship and materials.

XL - Extra Load

TOYO TIRES®

driven to perform

PROXES® ST III

Premium high performance tire for SUVs, sport trucks and select crossovers.

▶ **PROXES® ST III**

Premium performance all-season tire for SUVs, Sport Trucks and select crossovers.

The Toyo Proxes® ST III is the perfect balance of dynamic looks and sport oriented performance for sport trucks, SUVs and Crossover vehicles. Combining enhanced traction and handling, not only on dry roads but in the wet as well ... all while adding style and great looks to any vehicle. Now backed by a 64,000 km treadwear warranty.

Quiet comfortable ride with a responsive performance feel.

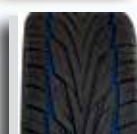

Features & Benefits

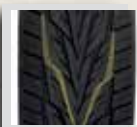

ADVANCED CONSTRUCTION AND COMPOUNDS
>> Build to handle the added weight handling characteristics of SUVs, crossovers and sport trucks.
>> Tread compound contains silica for improved traction on wet and dry roads, while an advanced polymer and dispersion method improves traction and reduces rolling resistance.

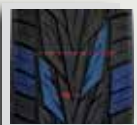

DIRECTIONAL TREAD PATTERN
>> For improved performance on dry roads.
>> Increased traction on wet roads.

TWO LATERAL GROOVES
>> Improves water and slush evacuation to reduce the risk of hydroplaning.

LIGHTNING GROOVES
>> For a unique attractive look.
>> Helps remove water from the center of the tread for better traction.

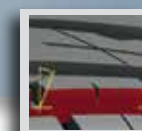

OFFSET BLOCK PATTERN
>> Offsetting the blocks reduces tread noise for a quieter more comfortable ride.

DYNAMIC EDGE TECHNOLOGY

Toyo has added a new innovation, a slight incline to the leading and trailing edges of the outer blocks groove edges. Adding these angled edges further reduces the chance of block deformation keeping more rubber on the road for better performance while reducing irregular wear.

2 CIRCUMFERENTIAL GROOVES

>> Helps evacuate water and slush for added traction during inclement weather.

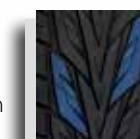

MULTI WAVE SIPES

>> Minimize irregular wear for a smooth, quiet ride.
>> Increases all season traction.

OFFSET "ANGLED" BLOCKS

>> Maximize the block rigidity for better dry performance.
>> The specific angle improves all season performance.

ARROWHEAD TAPER

>> Improves straight-line stability and further increases water drainage for better contact to the road surface.

LARGE OUTER BLOCKS

>> Improves the tires rigidity for better traction and cornering.
>> The slight incline angle reduces deformation during braking for a firmer grip.

LARGE EVACUATION GROOVES

>> Enhances all season traction by improving water and slush drainage.
