

TOYO TIRES®

M165™

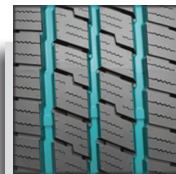

ALL SEASON COMMERCIAL LIGHT TRUCK/VAN TIRE

Built for the tough demands placed on modern commercial vans. Its construction and tread design provide greater durability and improved tread life. Designed for passenger transportation, delivery hauling, and light commercial applications offering confident traction under heavy loads. The M165 also delivers confident handling in both dry and wet conditions.

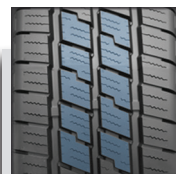

ALL SEASON TRACTION

- >> Large evacuation grooves ensure superior water and slush drainage during inclement weather.
- >> A rib based tread design helps the tire remain stable on dry or wet paved roads especially during faster highway driving.

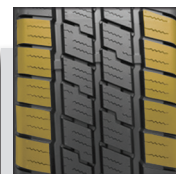

INTERLOCKING BLOCK DESIGN

- >> The interlocking block design reduces block squirm resulting in a more stable ride even under loaded conditions.
- >> Less block movement also improves the wear life of the tire and reduces the chance of irregular wear.

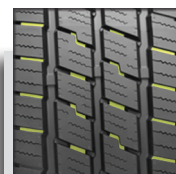

OUTER BLOCK ALTERNATING RIB DESIGN

- >> The outer blocks are designed for added stability as well as noise reduction.

BLOCK RIB SUPPORT

- >> An interlocking bridge support system further reduces block movement for improved tread life and driving stability.

Improved Wear life

Hazards

Improved Stability

Improved Durability

CONSTRUCTION DESIGNED THOSE TUFF JOBS

SIDEWALL PROTECTOR

>> Protects against cuts and abrasions

NEW CAP COMPOUND

>> Equipped with a new rubber cap compound utilizing Nano Balance Technology for commercial LT tires. This delivers excellent wear life while maintaining fuel efficiency.

>> The base compound is designed to resist heat buildup.

IMPROVED CARCASS PROFILE

>> Maintains the integrity of the tires profile during those heavier commercial applications.

E-BALANCE BEAD DESIGN

>> Adds to the durability of the tires casing.

Designed to handle the load requirements of today's commercial vehicle applications.

Toyo Tires' e-balance technology improves fundamental performance characteristics and their compatibility with one another like tire life, irregular wear resistance, endurance and fuel consumption.

Added technology ensures improved stability, durability and tread life.
